Notes:
- To ensure the greatest possible applicability of this document, IAS/IFRS English terminology has been used.
- Please note that decimal points have not been used in the usual English way. This means that for instance DKK 146.940 means the amount of DKK 146,940, and that 23,5 % means 23.5 %.

Management's statement

Today, the Board of Directors and the Executive Board have approved the annual report of Ole Lynggaard A/S for the financial year 1 January - 31 December 2024.

The annual report has been prepared in accordance with the Danish Financial Statements Act.

We consider the chosen accounting policy to be appropriate, and in our opinion, the consolidated financial statements and the parent company financial statements give a true and fair view of the financial position of the Group and the Parent Company at 31 December 2024, and of the results of the Group and the Company's operations as well as the consolidated cash flows for the financial year 1 January – 31 December 2024.

Further, in our opinion, the Management's review gives a true and fair review of the matters discussed in the Management's review.

We recommend that the annual report be approved at the Annual General Meeting.

Independent auditor's report

To the Shareholders of Ole Lynggaard A/S

Opinion

We have audited the consolidated financial statements and the parent company financial statements of Ole Lynggaard A/S for the financial year 1 January to 31 December 2024, which comprise income statement, balance sheet, statement of changes in equity, notes and a summary of significant accounting policies for both the Group the Parent Company, as well as consolidated statement of cash flows. The consolidated financial statements and the parent company financial statements are prepared under the Danish Financial Statements Act.

In our opinion, the consolidated financial statements and the parent company financial statements give a true and fair view of the financial position of the Group and the Parent Company at 31 December 2024, and of the results of the Group and the Company's operations as well as the consolidated cash flows for the financial year 1 January - 31 December 2024 in accordance with the Danish Financial Statements Act.

Basis for conclusion

We conducted our audit in accordance with International Standards on Auditing (ISAs) and the additional requirements applicable in Denmark. Our responsibilities under those standards and requirements are further described in the "Auditor's Responsibilities for the Audit of the Consolidated Financial Statements and the Parent Company Financial Statements" section of our report. We are independent of the Group in accordance with the International Ethics Standards Board for Accountants' International Code of Ethics for Professional Accountants (IESBA Code) and the additional ethical requirements applicable in Denmark, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Management's Responsibilities for the Consolidated Financial Statements and the Parent Company Financial Statements

Management is responsible for the preparation of consolidated financial statements and parent company financial statements that give a true and fair view in accordance with the Danish Financial Statements Act, and for such internal control as Management determines is necessary to enable the preparation of consolidated financial statements and parent company financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements and the parent company financial statements, Management is responsible for assessing the Group´s and the Parent Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting in preparing the consolidated financial statements and the parent company financial statements unless Management either intends to liquidate the Group or the Company or to cease operations, or has no realistic alternative but to do so.

This document has esignatur Agreement-ID: 001281Hnxww252536922

Auditor's Responsibilities for the Audit of the Consolidated Financial Statements and the Parent Company Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements and the parent company financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs and the additional requirements applicable in Denmark will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements and parent company financial statements.

As part of an audit conducted in accordance with ISAs and the additional requirements applicable in Denmark, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements and the parent company financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group´s and the Company's internal control.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by Management.

- Conclude on the appropriateness of Management's use of the going concern basis of accounting in preparing the consolidated financial statements and the parent company financial statements and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group´s and the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements and the parent company financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group and the Company to cease to continue as a going concern.

This document has esignatur Agreement-ID: 001281Hnxww252536922

- Evaluate the overall presentation, structure and contents of the consolidated financial statements and the parent company financial statements, including the disclosures, and whether the consolidated financial statements and the parent company financial statements represent the underlying transactions and events in a manner that gives a true and fair view.

- Plan and perform the group audit to obtain sufficient appropriate audit evidence regarding the financial information of the entities or business units within the group as a basis for forming an opinion on the consolidated financial statements and the parent company financial statements. We are responsible for the direction, supervision and review of the audit work performed for purposes of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Statement on Management's Review

Management is responsible for Management's Review.

Our opinion on the consolidated financial statements and the parent company financial statements does not cover Management's Review, and we do not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements and the parent company financial statements, our responsibility is to read Management's Review and, in doing so, consider whether Management's Review is materially inconsistent with the consolidated financial statements and the parent company financial statements or our knowledge obtained during the audit, or otherwise appears to be materially misstated.

Moreover, it is our responsibility to consider whether Management's Review provides the information required under the Danish Financial Statements Act.

Based on the work we have performed, we conclude that Management's Review is in accordance with the financial statements and has been prepared in accordance with the requirements of the Danish Financial Statement Act. We did not identify any material misstatement of Management's Review.

Description of key activities of the company

OLE LYNGGAARD COPENHAGEN is a family-owned, design basede company that manufactures and sells jewellery of the higtest class in Denmark as in export markets. The family company was founded by Ole Lynggaard in 1963.

We do this based on our position as a leading Scandinavian luxury brand, rooted in a passion for the unique design, styling and craftsmanship. Our idea is to make young women of all ages feel beautiful and unique. Our vision is to establish a global status as the favorite luxury brand for the quality-conscious customer who demands Scandinavian jewellery design, which can please for generations.

Our mission is to inspire and create passion for our jewelry and brand worldwide by supplying products in a unique, timeless and functional design of the highest quality.

Approximately 130 talented and dedicated employees are gathered to bring this mission to life, of which approximately 40 jewelers work at the company's premises in Hellerup.

We want the company to grow in an organic and controlled way without compromising the company's very high standards of quality at all levels.

We will, in the coming years, with a close relationship with dealers and partners, and a constant focus on our values, pursue our strategy with the aim to ensure continued brand building and profitable growth, economic independence and an exciting and challenging workplace for our employees. We will continue to be a Danish family-owned company with constant focus on design, production and craftsmanship, where the family's close connection and ownership ensure the present company culture.

Development in activities and financial matters

The gross profit for the parent compagny for the year totals DKK 91.276 thousand against DKK 74.977 thousand last year. Income or loss from ordinary activities after tax totals DKK 14.189 thousand against DKK 632 thousand last year.

The gross profit for the group for the year totals DKK 121.219 thousand against DKK 105.253 thousand last year. Income or loss from ordinary activities after tax totals DKK 14.189 thousand against DKK 632 thousand last year.

Financial risks and the use of financial instruments

The company has an ongoing risk due to the volatility of the price of gold on various currencies. This risk is mitigated by the use af hedging instruments. The expected need for currency trade and gold is hedged for the coming year in November, giving the company the ability to fix prices for a full year.

I 2025, due to high future cost of gold, only the first quarter has been hedged.

This document has esignatur Agreement-ID: 001281Hnxww252536922

Expected developments

Modest growth was expected in 2024 driven by organic growth in existing stores and markets but with the war in Europe and uncertainty in the world it was difficult to predict. We struggled in the first quarter, was ok in second and third quarter, but not able to close the gab from the first. The fourth quarter went extremely well, closing the gab from the first quarter and adding to turnover to outperform the budget.

We face challenges with inflation, gold prices, custom fluxations and general world uncertainties. It is impossible to predict the impact, but so far, we are on track. If it continues like first quarter our expectations for 2025 are good. We do not expect growth in 2025 due to cleanup in our retailers where we have closed approximately 20 resellers at the end of 2024, and with extraordinary expenses, among other things, we believe in income from ordinary activities after tax will be between 10.000 and 15.000 DKK thousand.

Based on the current situation and the information available, Management expects the company to continue operations without significant structural changes.

Events occurring after the end of the financial year

No events have occurred subsequent to the balance sheet date, which would have material impact on the financial position of the company.

Branches abroad

Alongside two Danish stores, the company operates own stores in Sweden, Australia and Germany. The store in France is closed during 2024. In addition to this, the company has legal entities in Germany and Switzerland with a sales force working on behalf of the Danish parent company.

20. Disclosures on fair value

Group

	Derived financial instruments
Fair value at 31 December 2024	839.928
Unrealised change in fair value of the year recognised in the statement of financial activity	-2.834.675

21. Contingencies

Contingent liabilities

Lease liabilities

The company and its group has entered into 4 leases. The remaining liability amounts to DKK 417 thousand at 31 December 2024, and remaining maturity of 13 to 26 months.

Lease on premises

Moreover, the company and its group enterprises have entered into 9 leases on premises. The total liability amounts to DKK 68.776 thousand at 31 December 2023, and the irrevocable periods are from 3 to 108 months.

Hedging instruments

The company makes use of hedging instruments used to hedge recognised and non-recognised transactions concerning foreign currency translation adjustments and raw materials. Terms for the open contracts at 31 December 2024 are less than 12 months. The market value of these open contracts is recognised in the balance sheet.

Guarantee commitments:

The Company and its group enterprises have provided bank guarantees for DKK 1.716 thousand.

Other contingent liabilities:

The company is involved in a lawsuit where a former partner has filed a claim for compensation of DKK 7.6 million due to the termination of the collaboration. The company considers the claim to be unfounded, and therefore, no provision has been made for it in the financial statements. It has not yet been decided under which jurisdiction the case will be heard.

This document has esignatur Agreement-ID: 001281Hnxww252536922

DKK thousand.

21. Contingencies (continued)

Joint taxation

The company acts as administration company for the group of companies subject to the Danish scheme of joint taxation and is unlimitedly, jointly, and severally liable, along with the other jointly taxed companies, to pay the total corporation tax.

The company is unlimitedly, jointly, and severally liable, along with the other jointly taxed companies, for any obligations to withhold tax on interest, royalties, and dividends.

The liability relating to obligations in connection with withholding tax on dividends, interest, and royalties represents an estimated maximum of DKK 2.167 thousand .

Any subsequent adjustments of corporate taxes or withholding taxes, etc., may result in changes in the company's liabilities.

22. Related parties

Controlling interest

Charlotte Lynggaard ApS	Shareholder
Søren Lynggaard ApS	Shareholder

Transactions

All transactions with related parties have taken place on market terms.

Consolidated financial statements

None of the company's parent companies present consolidated financial statements.

Accounting policies

The annual report for Ole Lynggaard A/S has been presented in accordance with the Danish Financial Statements Act regulations concerning reporting class C enterprises (medium sized enterprises).

The accounting policies are unchanged from last year, and the annual report is presented in DKK.

Recognition and measurement in general

Income is recognised in the income statement concurrently with its realisation, including the recognition of value adjustments of financial assets and liabilities. Likewise, all costs are recognised in the income statement, including depreciations amortisations, write-downs for impairment, provisions, and reversals due to changes in estimated amounts previously recognised in the income statement.

Assets are recognised in the statement of financial position when it seems probable that future economic benefits will flow to the group and the value of the asset can be reliably measured.

Liabilities are recognised in the statement of financial position when it is seems probable that future economic benefits will flow out of the group and the value of the liability can be reliably measured.

Assets and liabilities are measured at cost at the initial recognition. Hereafter, assets and liabilities are measured as described below for each individual accounting item.

Certain financial assets and liabilities are measured at amortised cost, allowing a constant effective interest rate to be recognised during the useful life of the asset or liability. Amortised cost is recognised as the original cost less any payments, plus/less accrued amortisations of the difference between cost and nominal amount. In this way, capital losses and gains are allocated over the useful life of the liability.

Upon recognition and measurement, allowances are made for such predictable losses and risks which may arise prior to the presentation of the annual report and concern matters that exist on the reporting date.

Foreign currency translation

Transactions in foreign currency are translated by using the exchange rate prevailing at the date of the transaction. Differences in the rate of exchange arising between the rate at the date of transaction and the rate at the date of payment are recognised in the profit and loss account as an item under net financials. If currency positions are considered to hedge future cash flows, the value adjustments are recognised directly in equity in a fair value reserve.

Receivables, payables, and other foreign currency monetary items are translated using the closing rate. The difference between the closing rate and the rate at the time of the occurrence or initial recognition in the latest financial statements of the receivable or payable is recognised in the income statement under financial income and expenses.

Fixed assets acquired and paid for in foreign currency are measured at the exchange rate prevailing at the date of the transaction.

This document has esignatur Agreement-ID: 001281Hnxww252536922

Group enterprises abroad, associates, and equity investments are considered to be independent entities. The income statements are translated at an average exchange rate for the month, and the balance sheet items are translated at the closing rates. Currency translation differences, arising from the translation of the equity of group enterprises abroad at the beginning of the year to the closing rate and from the translation of income statements from average prices to the closing rate, are recognised directly in equity in the fair value reserve in the Consolidated Financial Statement. This also applies to differences arising from translation of income statements from average exchange rate to closing rate.

Translation adjustment of balances with group enterprises abroad that are considered part of the total investment in group enterprises are recognised directly in equity in the fair value reserve. Likewise, foreign exchange gains and losses on loans and derived financial instruments for currency hedging independent group enterprises abroad are recognised directly in equity.

Derivatives

For significant items with price risk in currenxy or precious metals, risk hedging takes place using hedging agreements for the year's expected positions in accordance with the budget.

At their initial recognition, derivatives are recognised at cost in the statement of financial position. Hereafter, they measured at fair value. Positive and negative fair values of derivatives are recognised under other receivables and payables, respectively.

Changes in the fair value of derived financial instruments classified as and meeting the criteria for hedging the fair value of a recognised asset or a recognised liability are recognised in the income statement together with changes in the fair value of the hedged asset or the hedged liability.

Changes in the fair value of derived financial instruments classified as hedging of future cash flows are recognised in other receivables or other payables, and in equity.

If the future transaction results in the recognition of assets or liabilities, amounts previously recognised in equity are transferred to the cost of the asset or the liability, respectively. If the future transaction results in income or costs, amounts recognised in equity on a continuing basis are transferred to the income statement for the period in which the hedged item affected the income statement.

For derived financial statements that are no longer recognised as hedging instruments, changes in fair value are recognised in the income statement on a current basis.

The consolidated financial statements

The consolidated income statements comprise the parent company Ole Lynggaard A/S and those group enterprises of which Ole Lynggaard A/S directly or indirectly owns more than 50 % of the voting rights or in other ways exercise control.

Consolidation policies

This document has esignatur Agreement-ID: 001281Hnxww252536922

The consolidated financial statements have been prepared as a summary of the parent company's and the group enterprises' financial statements by adding together uniform accounting records calculated in accordance with the group's accounting policies.

Investments in group enterprises are eliminated by the proportionate share of the group enterprises' fair value of net assets and liabilities at the acquisition date.

In the consolidated financial statements, the accounting records of the group enterprises are recognised by 100%. The minority interests' share of the profit for the year and of the equity in the group enterprises, which are not 100% owned, is included in the group's profit and equity, but presented separately.

Purchases and sales of minority interests under continuing control are recognised directly in equity as a transaction between shareholders.

Investments in associates are measured in the statement of financial position at the proportionate share of the enterprises' equity value i calculated in accordance with the parent company's accounting policies and with proportionate elimination of unrealised intercompany gains and losses. In the income statement, the proportional share of the associates' results is recognised after elimination of the proportional share of intercompany gains and losses.

The group activities in joint operations are recognised in the consolidated financial statements record by record.

Income statement

Gross profit

Gross profit comprises the revenue, changes in inventories of finished goods, and work in progress, own work capitalised, other operating income, and external costs.

The enterprise will be applying IAS 18 as its basis of interpretation for the recognition of revenue.

Revenue is recognised in the income statement if delivery and passing of risk to the buyer have taken place before the end of the year and if the income can be determined reliably and inflow is anticipated. Revenue is measured at the fair value of the consideration promised exclusive of VAT and taxes and less any discounts relating directly to sales.

Cost of sales comprises costs concerning purchase of raw materials and consumables less discounts and changes in inventories.

This document has esignatur Agreement-ID: 001281Hnxww252536922

Other operating income comprises items of a secondary nature as regards the principal activities of the enterprise, including operating loss and conflict compensation as well as salary reimbursements received. Compensation is recognized when it is overwhelmingly probable that the company will receive the compensation.

Other external expenses comprise expenses incurred for distribution, sales, advertising, administration, premises, loss on receivables, and operational leasing costs.

Staff costs

Staff costs include salaries and wages, including holiday allowances, pensions, and other social security costs, etc., for staff members.

Staff cost, directly attributed to the development of production of goods are recognised in cost of inventories.

Incentive programmes

A bonus scheme for the retail manager has been established. The scheme provides the opportunity of achieving a bonus which is determined in proportion on the annual sales and the achieved bonus percentages is calculated from the result of the year before tax. The bonus can max. amount of 5% of the result for the year before tax.

In addition there are regular bonus schemes for traveling sales representatives. The bonus schemes ar calculated in proportion to their turnover.

The scheme is based on cash payment. However, the form of payment is optional – salary, pension, etc.

Depreciation, amortisation, and write-down for impairment

Depreciation, amortisation, and write-down for impairment comprise depreciation, amortisation, and write-down for the year and profit and loss on the disposal of intangible and tangible assets.

Other operating costs

Other operating costs comprise items of secondary nature as regards the principal activities of the enterprise.

Financial income and expenses

Financial income and expenses are recognised in the income statement with the amounts concerning the financial year. Financial income and expenses comprise interest income and expenses, financial expenses from financial leasing, realised and unrealised capital gains and losses relating to securities, debt and transactions in foreign currency, amortisation of financial assets and liabilities as well as surcharges and reimbursements under the advance tax scheme, etc.

This document has esignatur Agreement-ID: 001281Hnxww252536922

Results from investments in group enterprises

After full elimination of intercompany profit or loss less amortised consolidated goodwill, the equity investment in the individual entities are recognised in the income statement of the parent as a proportional share of the entities' post-tax profit or loss.

Tax on net profit or loss for the year

Tax for the year comprises the current income tax for the year and changes in deferred tax and is recognised in the income statement with the share attributable to the net profit or loss for the year and directly in equity with the share attributable to entries directly in equity.

The parent and the Danish group enterprises are subject to Danish rules on compulsory joint taxation of Danish group enterprises. The parent acts as an administration company in relation to the joint taxation. This means that the total Danish income tax payable by the Danish group companies is paid to the tax authorities by the company.

The current Danish income tax is allocated among the jointly taxed companies proportional to their respective taxable income (full allocation with reimbursement of tax losses).

Statement of financial position

Intangible assets

Development projects, patents, and licences

External development of software are mesured at external cost with deduction of accummulated depreciation. Software development cast are amortised over the estimated useful life which is 10 years from start of use of the system.

Aquired rights are measured at cost with decution of accummulated depreciation. Acquried rights are amortised on a straightline basis over the estimated useful life which is 5 years.

Profit and loss from the sale of development projects, patents, and licenses are measured as the difference between the sales price less sales costs and the carrying amount at the time of sale. Profit or loss is recognised in the income statement under amortisation and write-down for impairment.

Property, plant, and equipment

Property, plant, and equipment are measured at cost less accrued depreciation and write-down for impairment. Land is not subject to depreciation.

The depreciable amount is cost less any expected residual value after the end of the useful life of the asset. The amortisation period and the residual value are determined at the acquisition date and reassessed annually. If the residual value exceeds the carrying amount, the depreciation is discontinued.

This document has esignatur Agreement-ID: 001281Hnxww252536922

If the amortisation period or the residual value is changed, the effect on amortisation will, in future, be recognised as a change in the accounting estimates.

The cost comprises acquisition cost and costs directly associated with the acquisition until the time when the asset is ready for use.

The cost of a total asset is divided into separate components. These components are depreciated separately, the useful lives of each individual components differing, and the individual component representing a material part of the total cost.

Depreciation is done on a straight-line basis according to an assessment of the expected useful life and the residual value of the individual assets:

	Useful life	Residual value
Buildings	30 years	20 %
Plant and machinery	5-10 years	0-20 %
Other fixtures and fittings, tools and equipment	3-5 years	0-20 %

Minor assets with an expected useful life of less than 1 year are recognised as costs in the income statement in the year of acquisition.

Profit or loss derived from the disposal of property, land, and equipment is measured as the difference between the sales price less selling costs and the carrying amount at the date of disposal. Profit or loss is recognised in the income statement under depreciation.

As regards self-constructed assets, the cost comprises direct costs for materials, components, deliveries from subsuppliers, payroll costs, and borrowing costs from specific and general borrowing concerning the construction of each individual asset.

Property, plant, and equipment in progress

Property, plant, and equipment in progress are measured and recognised as the total costs incurred. When the work has been completed, the total value is transferred to the relevant item under property, plant, and equipment and is amortised from the date of entry into service.

Leases

Leases are regarded as operating leases. Payments in connection with operating leases and other lease agreements are recognised in the income statement for the term of the contract. The group's total liabilities concerning operating leases and lease agreements are recognised under contingencies, etc.

This document has esignatur Agreement-ID: 001281Hnxww252536922

Impairment loss relating to non-current assets

The carrying amount of both intangible and tangible fixed assets as well as equity investments in group enterprises are subject to annual impairment tests in order to disclose any indications of impairment beyond those expressed by amortisation and depreciation respectively.

If indications of impairment are disclosed, impairment tests are carried out for each individual asset or group of assets, respectively. write-down for impairment is done to the recoverable amount if this value is lower than the carrying amount.

The recoverable amount is the higher value of value in use and selling price less expected selling cost. The value in use is calculated as the present value of the expected net cash flows from the use of the asset or the asset group and expected net cash flows from the sale of the asset or the asset group after the end of their useful life.

Previously recognised impairment losses are reversed when conditions for impairment no longer exist. Impairment relating to goodwill is not reversed.

Investments

Investments in group enterprises

Investments in group enterprises are recognised and measured by applying the equity method. The equity method is used as a method of consolidation.

Investments in group enterprises are recognised in the statement of financial position at the proportionate share of the enterprise's equity value. This value is calculated in accordance with the parent's accounting policies with deductions or additions of unrealised intercompany gains and losses as well as with additions or deductions of the remaining value of positive or negative goodwill calculated in accordance with the acquisition method. Negative goodwill is recognised in the income statement at the time of acquisition of the equity investment. If the negative goodwill relates to contingent liabilities acquired, negative goodwill is not recognised until the contingent liabilities have been settled or lapsed.

Consolidated goodwill is amortised over its estimated useful life, which is determined on the basis of the management's experience with the individual business areas. Consolidated goodwill is amortised on a straight-line basis over the amortisation period, which represent 5-20 years. The depreciation period is determined on the basis of an assessment that these are strategically acquired enterprises with a strong market position and a long-term earnings profile.

In relation to material assets and liabilities recognised in group enterprises but are not represented in the parent, the following accounting policies have been applied.

This document has esignatur Agreement-ID: 001281Hnxww252536922

Investments in group enterprises with a negative equity value are measured at DKK 0, and any accounts receivable from these enterprises are written down to the extent that the account receivable is uncollectible. To the extent that the parent has a legal or constructive obligation to cover an negative balance that exceeds the account receivable, the remaining amount is recognised under provisions.

To the extent the equity exceeds the cost, the net revaluation of equity investments in group enterprises transferred to the reserve under equity for net revaluation according to the equity method. Dividends from group enterprises expected to be adopted before the approval of this annual report are not subject to a limitation of the revaluation reserve. The reserve is adjusted by other equity movements in group enterprises.

Newly acquired or newly established companies are recognised in the financial statement as of the time of acquisition. Sold or liquidated companies are recognised until the date of disposal.

On the acquisition of enterprises, the acquisition method, the uniting-of-interests method or the book value method is applied, cf. the above description under Business combinations.

Other financial instruments

Financial instruments recognised under non-current assets comprise listed bonds and shares measured at fair value on the reporting date. Listed financial instruments are measured at market price.

Other unlisted financial instruments are measured at cost. Write-down for impairment is done to the recoverable amount if this value is lower than the carrying amount.

Deposits

Deposits are measured at amortised cost and represent lease deposits, etc.

Inventories

Inventories are measured at cost according to the FIFO method. In cases when the net realisable value of the inventories is lower than the cost, the latter is written down for impairment to this lower value.

Costs of goods for resale, raw materials, and consumables comprise acquisition costs plus delivery costs.

Costs of manufactured goods and work in progress comprise the cost of raw materials, consumables, direct wages, and indirect production costs. Indirect production costs comprise indirect materials and wages, maintenance and depreciation of machinery, factory buildings, and equipment used in the production process, and costs for factory administration and factory management. Borrowing expenses are not recognised in cost.

The net realisable value for inventories is recognised as the estimated selling price less costs of completion and selling costs. The net realisable value is determined with due consideration of negotiability, obsolescence, and the development of expected market prices.

This document has esignatur Agreement-ID: 001281Hnxww252536922

Receivables

Receivables are measured at amortised cost, which usually corresponds to nominal value.

In order to meet expected losses, impairment takes place at the net realisable value. The company has chosen to use IAS 39 as a basis for interpretation when recognising impairment of financial assets, which means that impairments must be made to offset losses where an objective indication is deemed to have occurred that an account receivable or a portfolio of accounts receivable is impaired. If an objective indication shows that an individual account receivable has been impaired, an impairment takes place at individual level.

Accounts receivable for which there is no objective indication of impairment at the individual level are evaluated at portfolio level for objective indication of impairment. The portfolios are primarily based on the debtors' domicile and credit rating in accordance with the company's and the group's credit risk management policy. Determination of the objective indicators applied for portfolios are based on experience with historical losses.

Impairment losses are calculated as the difference between the carrying amount of accounts receivable and the present value of the expected cash flows, including the realisable value of any securities received. The effective interest rate for the individual account receivable or portfolio is used as the discount rate.

Prepayments

Prepayments recognised under assets comprise incurred costs concerning the following financial year.

Cash and cash equivalents

Cash and cash equivalents comprise cash at bank and on hand.

Equity

Reserve for net revaluation according to the equity method

The reserve for net revaluation according to the equity method comprises net revaluation of equity investments in subsidiaries, associates and equity interests proportional to cost.

The reserve may be eliminated in the event of losses, realisation of equity investments, or changes in the accounting estimates.

The reserve cannot be recognised by a negative amount.

Reserve for foreign currency translation

The reserve for foreign currency translation arises when translating accounting items in foreign currency.

The reserve is dissolved once the value adjustments have been applied or reversed.

This document has esignatur Agreement-ID: 001281Hnxww252536922

The reserve is distributable.

Reserve for hedging transactions

The reserve for hedging transactions arises when hedging instruments are subject to fair value adjustments.

The reserve is dissolved once the value adjustments have been applied or reversed.

The reserve is distributable.

Dividend

Dividend expected to be distributed for the year is recognised as a separate item under equity.

Income tax and deferred tax

As administration company, Ole Lynggaard A/S is liable to the tax authorities for the subsidiaries' corporate income taxes.

Current tax liabilities and current tax receivable are recognised in the statement of financial position as calculated tax on the taxable income for the year, adjusted for tax of previous years' taxable income and for tax paid on account.

The company is jointly taxed with consolidated Danish companies. The current corporate income tax is distributed between the jointly taxed companies in proportion to their taxable income and with full distribution with reimbursement as to tax losses. The jointly taxed companies are comprised by the Danish tax prepayment scheme.

Joint taxation contributions payable and receivable are recognised in the statement of financial position as ”Tax receivables from group enterprises" or "Income tax payable to group enterprises"

Deferred tax is measured on the basis of temporary differences in assets and liabilities with a focus on the statement of financial position. Deferred tax is measured at net realisable value.

Adjustments take place in relation to deferred tax concerning elimination of unrealised intercompany gains and losses.

Deferred tax is measured based on the tax rules and tax rates applying under the legislation prevailing in the respective countries on the reporting date when the deferred tax is expected to be released as current tax. Changes in deferred tax due to changed tax rates are recognised in the income statement, except for items included directly in the equity.

This document has esignatur Agreement-ID: 001281Hnxww252536922

Deferred tax assets, including the tax value of tax losses allowed for carryforward, are recognised at the value at which they are expected to be realisable, either by settlement against tax of future earnings or by set-off in deferred tax liabilities within the same legal tax unit. Any deferred net tax assets are measured at net realisable value.

Provisions

Provisions comprise expected costs of warranty commitments, loss on work in progress, restructuring, etc. Provisions are recognised when the group has a legal or actual commitment resulting from a previously occurred event and when it is probable that the settlement of the liability will result in consumption of the financial resources of the group.

Provisions are measured at net realisable value or at fair value. If the fulfilment of a liability is expected to take place far in the future, the liability is measured at fair value.

On the acquisition of entities, provisions for restructuring within the acquired entity are included in the acquisition cost, and thereby in the goodwill or the consolidated goodwill, to the extent that they have been recognised in the financial statements of the acquired entity in advance of the acquisition. Provisions for restructuring are included to the extent that they have been decided at the date of acquisition at the latest and that the process have been commenced.

When it is likely that the total costs will exceed the total income of contract work in progress, the total expected loss on the contract work in progress will be recognised as provisions for liabilities. The provision is recognised under production costs.

Liabilities other than provisions

Other liabilities concerning payables to suppliers, group enterprises, and other payables are measured at amortised cost which usually corresponds to the nominal value.

Statement of cash flows

The cash flow statement shows the cash flows of the group for the year, divided in cash flows deriving from operating activities, investment activities and financing activities, respectively, the changes in the liabilities, and group' cash and cash equivalents at the beginning and the end of the year, respectively.

A cash flow statement for the parent has not been prepared as the cash flows of the enterprise are included in the consolidated cash flow statement, cf. section 86, subsection 4, of the Danish Financial Statements Act.

The effect on cash flows derived from the acquisition and sale of enterprises appears separately under cash flows from investment activities. In the statement of cash flows, cash flows derived from acquirees are recognised as of the date of acquisition, and cash flows derived from sold enterprises are recognised until the date of sale.

This document has esignatur Agreement-ID: 001281Hnxww252536922

Cash flows from operating activities

Cash flows from operating activities are calculated as the group's share of the profit adjusted for non-cash operating items, changes in the working capital, and corporate income tax paid. Dividend income from equity investments are recognised under “Interest income and dividend received”.

Cash flows from investment activities

Cash flows from investment activities comprise payments in connection with the acquisition and sale of enterprises and activities as well as the acquisition and sale of intangible assets, property, plant, and equipment, and investments, respectively.

Cash flows from financing activities

Cash flows from financing activities include changes in the size or the composition of the group's share capital and costs attached to it, as well as raising loans, repayments of interest-bearing payables and payment of dividend to shareholders.

Cash and cash equivalents

Cash and cash equivalents comprise cash on hand and demand deposits and short-term financial instruments with a term of less than 3 months, which can easily be converted into cash and cash equivalents and are associated with an insignificant risk of value change.
